

AMENDMENTS TO THE SPECIFICATION

Please replace the Title with the following rewritten in amendment format:

Apparatus and Method for Power Optimized Replay Via Selective Recirculation
Of Instructions

Please replace Paragraph [00056] with the following Paragraph rewritten in amendment format:

[00056] In any representation of the design, the data may be stored in any form of a machine readable medium, such as a storage medium or carrier wave medium. An optical or electrical wave 660 modulated or otherwise generated to transport such information may define a carrier wave medium. A memory 650 or a magnetic or optical storage 640, such as a disk, may be the machine readable storage medium. Any of these mediums may carry the design information. The term "carry" (e.g., a machine readable medium carrying information) thus covers information stored on a storage device or information encoded or modulated into or onto a carrier wave. The set of bits describing the design or a particular of the design are (when embodied in a machine readable medium, such as a carrier or storage medium) an article that may be sealed in and out of itself, or used by others for further design or fabrication.
